# **Do You Really Need a Used Warranty for Older Vehicles?**

If your vehicle has a lot of miles, you're probably wondering if you even need a used warranty or if you should just save your money in case of a repair. But simply saving your money can be a very risky approach because you never know what's going to happen or how much it's going to cost. And if experience serves me well, I can tell you it's not going to be cheap, especially when the mechanic finds out you don't have a warranty.

I think everyone is worried about getting ripped off when they go to a car repair shop, and well, the sad truth is that some repair centers actually do rip you off when you walk in as an independent customer. Besides charging you exactly whatever is on their wall (or higher) for parts, you can probably count on the majority of that money you were saving going toward their crazy high labor charges and maybe even some charges for things your car doesn't even need.

But – and this is something most people don't pay enough attention to – when you are with a used warranty company like DCI Warranty Services, we act as your buffer to make sure repairs are legitimate and within the correct price range, even if the repair isn't covered under your service contract.

So if you think getting a used warranty for you car with a lot of mileage isn't worth it, I think you'll be surprised to learn how you can't afford NOT to have one!
